

Tutorial-1

Modules name: Login Page - Functional & UI Test Cases

Test Case ID: student_1

Environment Information: os: macos (Sequoia 15.5) system : laptop (macbook air) webpage

URL: <https://share.google/ebOXxWylL2RoFn9eG>

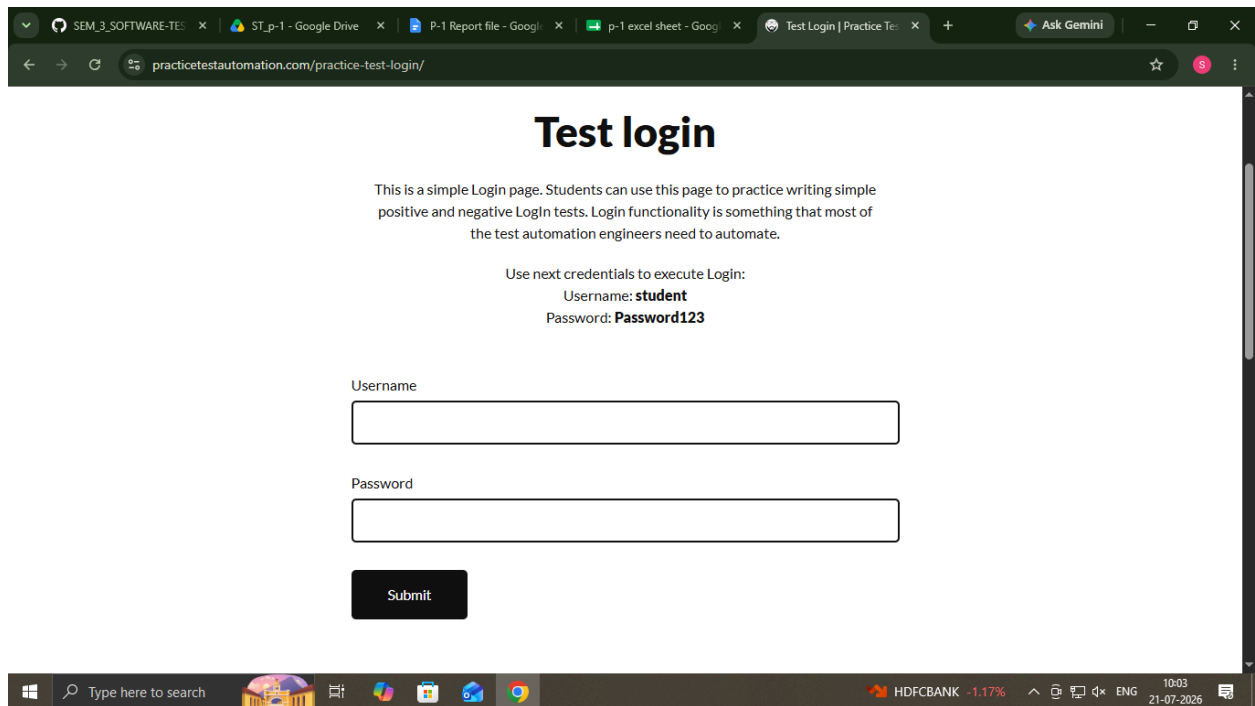

Screenshot:

Scenario 1:

Demo login page: sign up to demo login page

Test Steps:

1. Enter username
2. Enter password
3. Submit

Test login

This is a simple Login page. Students can use this page to practice writing simple positive and negative Login tests. Login functionality is something that most of the test automation engineers need to automate.

Use next credentials to execute Login:
Username: **student**
Password: **Password123**

Username

Password

Submit

Scenario 2:

Demo login page: Invalid username

Test Steps:

- 1.Filup username
- 2.Filup password
- 3.Submit
- 4.Invalid username

The screenshot shows a web browser window with the URL `practicetestautomation.com`. The browser's address bar and tabs are visible at the top. The website's header includes the logo for 'Practice Test Automation' and a navigation menu with links: HOME, PRACTICE, COURSES, AI WORKSHOP, BLOG, and CONTACT. The main content area is titled 'Test login' and contains the following text: 'This is a simple Login page. Students can use this page to practice writing simple positive and negative Login tests. Login functionality is something that most of the test automation engineers need to automate.' Below this, it says 'Use next credentials to execute Login:' followed by 'Username: **student**' and 'Password: **Password123**'. There is a form with two input fields: 'Username' and 'Password'. The 'Username' field is currently empty, and the 'Password' field is also empty. Below the form is a black 'Submit' button. A red error message box is displayed below the form, stating 'Your username is invalid!'. At the bottom of the page, there is a section titled 'Test case 1: Positive Login test' with a sub-section '1. Scenario'.

Scenario 3:

Demo login page: Invalid password

Test Steps:

- 1.Filup username
- 2.Filup password
- 3.Submit
- 4.Invalid password

Practice Test Automation

HOME PRACTICE COURSES AI WORKSHOP BLOG CONTACT

Hello

Welcome to Practice Test Automation!

I'm Dmitry Shyshkin, your guide on the path to a thriving QA career. Effortlessly master Selenium WebDriver and test automation to enhance your skills and increase your earnings.

Experience and Expertise

As a Principal Software Development Engineer in Test, I bring over a decade of experience in automating Web UI, API, and Mobile tests using tools like Selenium WebDriver, Apium, Postman, RestAssured, and more. I began my journey as a manual QA engineer and quickly developed a passion for test automation. Having served as the lead test automation expert in various projects, I'm confident in my ability to help you excel in test automation.

Beyond Test Automation

Not only have I automated tests, but I've also applied automation to job searches and even finding cheaper flights! Now, I'm eager to share this passion and knowledge with you.

Courses and Achievements

In 2017, I started sharing my test automation expertise through video courses, beginning with a Selenium WebDriver tutorial on YouTube. Today, I offer nine courses with over 100,000 students, including a BestSeller XPath course and a HighestRated Selenium course. With a 4.7 out of 5 instructor rating, I'm grateful to every student who has joined me on this journey.

Scenario 7:

Demo login page: details to course

Test Steps:

1. [Selenium WebDriver with Java: AI-Powered Test Automation](#)
2. [Selenium WebDriver: Selenium Automation Testing with Python](#)
3. [Java for Testers](#)
4. [Python: The Complete Guide for Software Testers](#), etc..

Courses

Selenium WebDriver with Java: AI-Powered Test Automation

Learn Selenium WebDriver with Java, TestNG, and AI-assisted automation using Cursor and MCP. Perfect for manual testers and engineers ready to build modern, AI-augmented test automation skills.

My top-rated, best-selling course - 2026 edition with a new section on AI-Powered Test Automation

What you'll learn in this course:

- Leverage AI to write and maintain Selenium tests using Cursor, MCP, and modern AI workflows (EVS in 2026)
- Build a complete test automation framework with Selenium WebDriver, Java, and TestNG
- Generate Page Objects and tests from natural language with AI-assisted prompts
- Run cross-browser tests in Chrome, Firefox, Edge, and Safari
- Master the Page Object Model and scalable framework design
- Debug and fix common Selenium failures, exceptions, and waits
- Learn Java programming essentials tailored for test automation
- Prepare for interviews with AI-augmented test automation talking points

Enroll in this course on Udemy

Selenium WebDriver: Selenium Automation Testing with Python

Learn Selenium WebDriver with Python and PyTest from scratch. This hands-on course is perfect for manual testers and anyone new to automation.

Top-rated, easy-to-follow course updated in 2024 - start automating real browser tests fast

What you'll learn in this course:

- Set up test automation framework with Selenium WebDriver
- Automate your first Selenium WebDriver test
- Automate software tests using Python and PyTest
- Execute tests in Chrome, Firefox, and other browsers
- Recognize test failures and exceptions, and fix them
- Use PyTest for better test structure and maintenance

Java for Testers

Scenario 8:

Demo login page: details to practice

Test Steps:

1. [Test Login Page](#)
2. [Test Exceptions](#)
3. [Test Table](#)

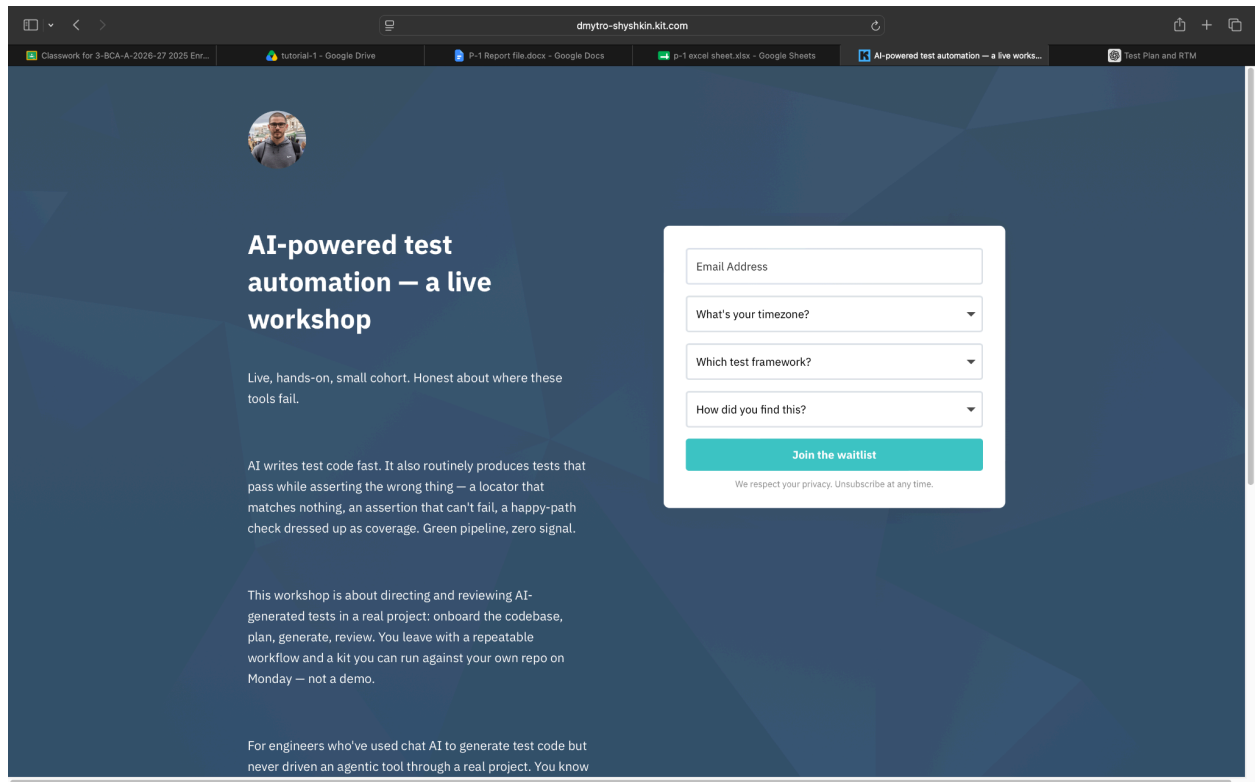

Scenario 9:

Demo login page: details to Aiworkshop

Test Steps:

- 1.Email address
- 2.Whta's your timezone
- 3.Which test framework
- 4.How did you find join?
- 5.join the waitlist.

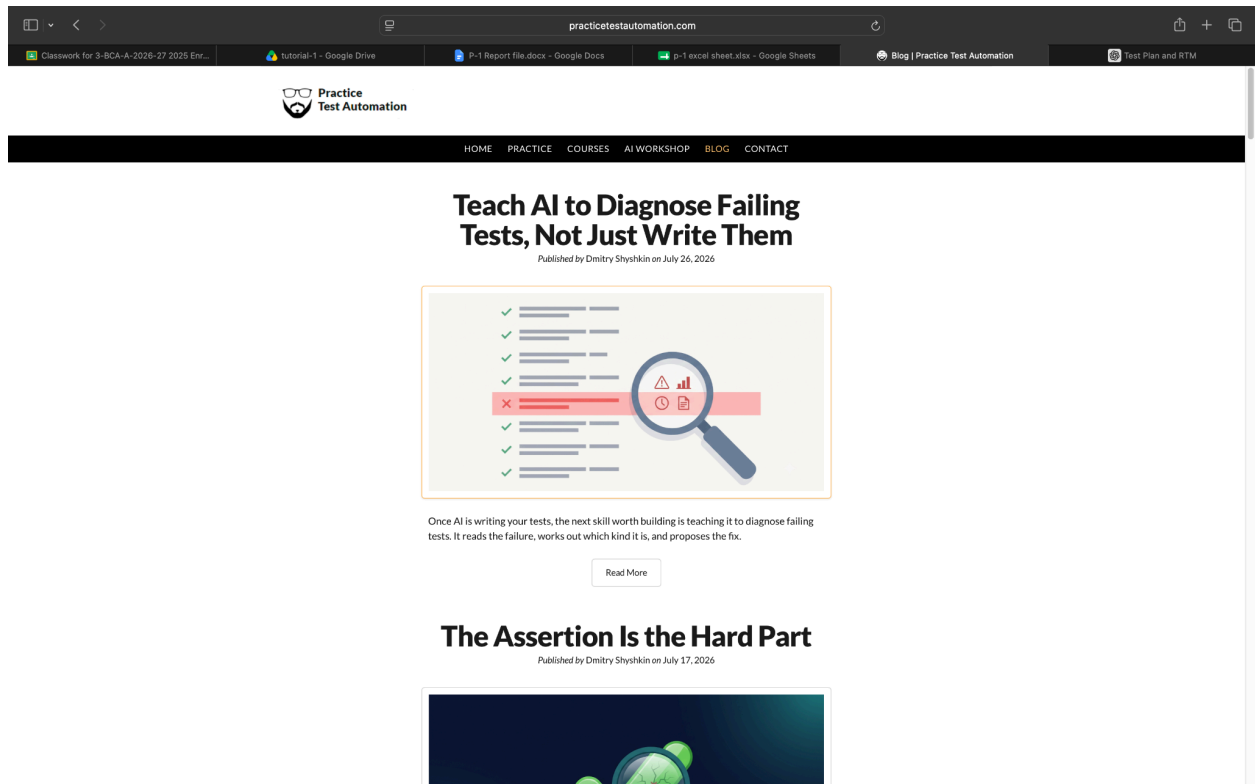

Scenario 10:

Demo login page: details to blog

Test Steps:

1. [Teach AI to Diagnose Failing Tests, Not Just Write Them](#)
2. [The Assertion Is the Hard Part](#)
3. [The Framework Was Never the Hard Part. AI Changed That.](#)
4. [Unlock Your Future: Selenium WebDriver Career Launcher Part 6, etc.](#)

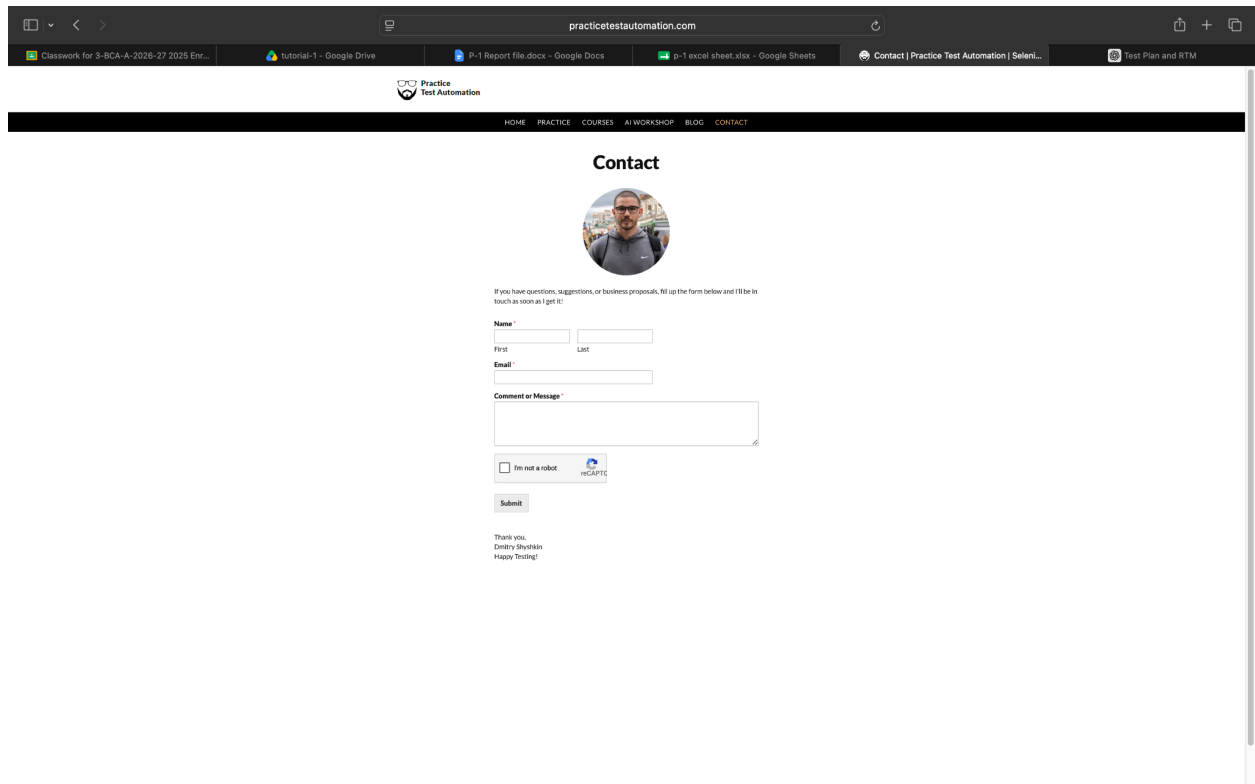

Scenario 11:

Demo login page: details to contact

Test Steps:

1. Name
2. Email
3. Comment of address

Scenario 12:

Demo login page: logout the page

Test Steps:

- 1.details the upload page**
- 2.logouting the page**

conclusion :

All functional and UI test cases for the Login Page were executed successfully. The application behaved as expected, and all test cases passed. The login functionality, validations, UI elements, and session handling were verified successfully.
