Tutorial-1 Screenshort:

The screenshot shows a web browser window with the 'Practice Test Automation' website. The browser's address bar shows 'Reader Available'. The website's header includes the logo and a navigation menu with links: HOME, PRACTICE, COURSES, AI WORKSHOP, BLOG, and CONTACT. The main content area features a large 'Hello' heading, a circular profile picture of a man with glasses, and a welcome message. Below this, there are sections for 'Experience and Expertise', 'Beyond Test Automation', and 'Courses and Achievements', each with a brief description of the author's background and expertise in test automation.

Hello

Welcome to Practice Test Automation!

I'm Dmitry Shyshkin, your guide on the path to a thriving QA career. Effortlessly master Selenium WebDriver and test automation to enhance your skills and increase your earnings.

Experience and Expertise

As a Principal Software Development Engineer in Test, I bring over a decade of experience in automating Web UI, API, and Mobile tests using tools like Selenium WebDriver, Apium, Postman, RestAssured, and more. I began my journey as a manual QA engineer and quickly developed a passion for test automation. Having served as the lead test automation expert in various projects, I'm confident in my ability to help you excel in test automation.

Beyond Test Automation

Not only have I automated tests, but I've also applied automation to job searches and even finding cheaper flights! Now, I'm eager to share this passion and knowledge with you.

Courses and Achievements

In 2017, I started sharing my test automation expertise through video courses, beginning with a Selenium WebDriver tutorial on YouTube. Today, I offer [nine courses with over 100,000 students](#), including a [BestSeller XPath course](#) and a [HighestRated Selenium course](#). With a 4.7 out of 5 instructor rating, I'm grateful to every student who has joined me on this journey.

The screenshot shows the 'Practice' page of the 'Practice Test Automation' website. The browser window shows the 'Reader Available' status. The website's header is consistent with the previous screenshot. The main content area features a large 'Practice' heading, followed by a list of practice topics. Each topic is presented as a link followed by a brief description of the practice content.

Practice

[Test Login Page](#) Simple login page where testers can execute positive and negative login test cases

[Test Exceptions](#) Page to reproduce the most common Selenium Exceptions.

[Test Table](#) Page to practice UI interactions and data validation with dynamic tables, filters, and sorting controls.

Courses

Selenium WebDriver with Java: AI-Powered Test Automation

Learn Selenium WebDriver with Java, TestNG, and AI-assisted automation using Cursor and MCP. Perfect for manual testers and engineers ready to build modern, AI-augmented test automation skills.

My top-rated, best-selling course - 2026 edition with a new section on AI-Powered Test Automation

What you'll learn in this course:

- Leverage AI to write and maintain Selenium tests using Cursor, MCP, and modern AI workflows (EVS in 2026)
- Build a complete test automation framework with Selenium WebDriver, Java, and TestNG
- Generate Page Objects and tests from natural language with AI-assisted prompts
- Run cross-browser tests in Chrome, Firefox, Edge, and Safari
- Master the Page Object Model and scalable framework design
- Debug and fix common Selenium failures, exceptions, and waits
- Learn Java programming essentials tailored for test automation
- Prepare for interviews with AI-augmented test automation talking points

Selenium WebDriver: Selenium Automation Testing with Python

Learn Selenium WebDriver with Python and PyTest from scratch. This hands-on course is perfect for manual testers and anyone new to automation.

Top-rated, easy-to-follow course updated in 2024 - start automating real browser tests fast

What you'll learn in this course:

- Set up test automation framework with Selenium WebDriver
- Automate your first Selenium WebDriver test
- Automate software tests using Python and PyTest
- Execute tests in Chrome, Firefox, and other browsers
- Recognize test failures and exceptions, and fix them
- Use PyTest for better test structure and maintenance
